

**ADDENDUM NUMBER TWO FOR  
CRACK SEAL PROJECT  
BID NUMBER 2019-038**

**THIS ADDENDUM MUST BE ACKNOWLEDGED.**

**THIS ADDENDUM SHALL BECOME A PART OF THIS SOLICITATION.**

**The following information is being added or amended as indicated as a part of the Invitation to Bid:**

The average urban road is 24' wide, so can we assume that (as an example) Colorado Ct is only going to cover 168' of roadway (24 X 168 = 4029)?

**This is not a safe assumption to make, I would suggest that the roadway surface be reviewed in person. We have roads that are 12' wide and some that are 43' wide.**

To eliminate inflated cost of material/product, can you change quantity from EACH to TON or POUND per road/street?

**We can change the unit to pounds/street, see attached. There is also a correction to the SF number on the Walz Avenue line item, there was a typo.**

Our problem is, based on the information that you are providing there is no way to estimate the amount of crack seal material needed, to properly bid this project. An EACH quantity item will/may require over-estimating the amount of material to be used.

**We expect each company to review the street surfaces and give us your estimate of what it will take to fill the cracking and concrete joint connections on each street. The City is not providing companies our assumptions for each street.**

What permits will be required from the Contractor?

**The selected contractor will need to pull a ROW permit with the City streets named, provide a certified traffic control plan for the work areas and keep with the schedule provided on the permit unless weather delays are encountered. In the past the City has given the crack seal contractor free rein on schedule, this has caused us issues with residents and randomly appearing work areas. This year the contractor will be held to time frames, permitting and noticing.**

Is the City providing the "72 Hour Notice" pamphlets?

**No, the contractor must present the 72 hour pamphlet draft to the City for approval prior to them being placed and must provide those pamphlets on their own. The City will notice the contractors schedule on our website, social media, to the local radio stations and within our utility billings the month prior to commencing work so the public is aware of the work coming to their area.**

Will a CCA or ATSSA certified TCS be required on the project site when active traffic control is required?

**A certified TCS will be required on site if there is a flagging situation during that day's work. A TCS should approve the signage layout at the beginning of the work day if it was modified from the previous day.**

Are short-term road closures allowed?

**This would have to be discussed on a case by case basis. It will depend on which street, what time of day and what days it would pertain too. We have events and construction all over town this summer, so we would not want to allow a closure if it affected another approved event or project.**

**This addendum must be acknowledged.**

**This Addendum may be emailed to [bidresponse@cogs.us](mailto:bidresponse@cogs.us) or included with your bid submittal.**
