**ACCESSIBILITY:**

My family is from rifle but visit Glenwood often, as we have family there. With a disabled child, it would be wonderful to have more play areas that are disability friendly! Things like wheel chair swings and larger swings for big kids who cannot balance and sit on a normal swing would be amazing!

There is a huge community of disabled and challenged children in our area, we really need an accessible playground with equipment for them.

**Disability access to playground**

Hello, I am an advocate for the Arc Central Mountains and most importantly, mom of the awesome Turner that lives with a rare genetic mutation. He loves to play, loves country music and uses a wheelchair to get around. Everyone deserves the right to play including the 20% of our population that lives with disabilities. I strongly request that the playground be a universal design that is accessible to all and includes play for varying disabilities, mobility issues, hearing challenges, sensory issues, vision. I would love to be included on planning.

Jenni Fautsko 970.379.8945  
Jenni@arccentralmountains.org Thank you very much!

I would love to see an accessible playground. Currently the closest playground that my son can use is in Grand Junction.

Please make this playground accessible to ALL abilities. Under federal law new and remodeled playgrounds should be accessible to all. The nearest playground that is accessible to children with mobility children is Grand Junction. Many of these families unfortunately are not able to have their kids participate in extra curriculums. (Either people are intimate for just have no interest in working with special needs kiddos). Going to the park is one of the few things children with different abilities can do and it's unfortunate when families have to make that hour drive just to find a park that is accessible.

Accessible playground is a must

Increase access for children and adults with physical challenges, with: better curb cuts, parking, playground equipment, replace the steps to the backside of the baseball outfield with a ramp. These improvements will be helpful for all people whether in a wheelchair, pushing a stroller, or someone on crutches from a ski injury.

Access for those with disabilities is a MUST.

Lots of accessibility for different abilities

Proper grounding for myself who uses a cane and my young daughter who uses a wheelchair. Please go above and beyond basic ADA regs and strive for Universal Design for ALL ABILITIES AND AGES. Shade is also important as someone who also continually fights skin cancer. We shouldn't have to travel to Grand Junction or Denver to play on a playground. ADA is the law and this area is extremely lame about it. My children are eighth generation locals and we shouldn't have to move to the city to have their needs met.

More disability minded.

## **BASEBALL – SOCCER FIELD AREA:**

An all turf field would DEFINITELY be utilized.

I absolutely detest fake turf. The ball field at Aspen Rec smells like plastic off-gassing as I ride past it on a warm day. Same chemical smell from our synthetic tennis courts.

I think the baseball field should be moved closer to the high school on school district ground

Reconfigure the field and put home plate close to playground. Sledding hill goes to where infield is now and the dead space in center becomes your pickle courts terraced above current tennis court. Find a win win.

I am in support of a more basic and natural park that doesn't include many specific features like baseball diamonds and pickle ball courts. Less is more. I think the baseball diamond is underutilized for the huge amount of space it takes up, is unsightly, and cannot be used for much other than baseball or softball. I think it should be removed. A soccer field would likely see more use and could be used for alternative activities such as football or ultimate frisbee. Baseball and softball are not exactly the safest activities to be playing in a multi use park space anyway and there are already plenty of baseball fields in other Glenwood parks.

This town needs more places for people to play soccer. It's the fastest growing sport in the nation and a ton of people play here, yet we have so few areas for people to play soccer. Small fields for informal pickup games are fine - they can be used for youth during youth seasons. If the idea of tearing out the tennis courts to accommodate pickle ball is being discussed, why not consider something similar for a small turf area for kids to play soccer. Or, we must make sure that those courts are for multi-sport use, including soccer. I'd wager more people regularly play soccer in this town than those that play pickle ball and baseball combined. We have tons of baseball fields (unused most of the year). There is a segment of the community that loves pickle ball - they need more space, so yes let's make sure we

integrate that. At the same time, don't forget about all the kids and adults that play soccer. I am one of the people that organizes pickup soccer in town and we have a very hard time finding space and there are a ton of people that play. Thanks so much for doing this.

I struggle with concept of artificial turf. If city can explain how it is better than real sod and not ultimately damaging to environmental t or no worse than sod that takes water and maintenance, I might be more for it. Our kids and our air need real earth and real plants.

Allow the baseball fields to be used for Little Leagues, community center and drop in baseball.

Soccer fields

Soccer

I am concerned with additional heat added from the installation of a synthetic field. The baseball fields already seem to be very hot during sunny days.

I prefer trees and landscape to the baseball diamond. I'd like to see baseball eliminated and referred to Two Rivers Park.

Soccer fields are limited in the valley. It would be great if there could be an addition of soccer playing space in Glenwood.

Soccer nets. Regular size or smaller size for pick-up soccer.

Add mesh in the area of baseball (Sp)

#### **BASKETBALL:**

resurface the basketball court!

#### **BIKES AND SKATEBOARDS:**

Bike park, pump track! Skatepark

Would love a skate park!

#### **DOGS:**

and the main reason I do not regularly use the park and haven't in years - ENFORCE THE NO DOGS/LEASH LAWS!!! NOTHING WORSE THAN TRYING TO ENJOY THE PARK AND SEEING SOMEONE FEELING THE RULES ABOUT DOGS DON'T APPLY TO THEM OR FIDO - OR WORSE, ENCOUNTERING POOP IN THE SAND!

Dog run area.

dog walking.

More dog friendly provisions and possibly a dog area.

#### **GARDENS/FLOWERS/SHADE/ART/MUSIC:**

The park should have more art and gardens to become an attraction to stop and visit. We have only one park that is central to Glenwood. Not all parks need to address our competitive needs.

A labyrinth, zen garden, or a maze garden done with shrubs would be great.

The city of Glenwood Springs needs to get their priorities in order. Why are we discussing a major overhaul of a park that functions adequately - but can't manage to even maintain our city streets?

Sitting areas under shade trees

Musical instruments like Moab Utah part. Great for adults and children and very classy.

art statues

More trees for shade.

Keep it lower maintenance where possible. Adding some flowers/signage may encourage more visitors to enjoy the park and/or relax and picnic there.

I believe additional flowers, etc. is frivolous and adds unnecessary upkeep while simultaneously taking away open/usable space.

My only comment is to keep climate change in mind. Maintaining a water feature during a drought or when water restrictions are in place may cause backlash. Plants that are more drought-tolerant should be selected.

Add a monument of a large strawberry or the person that invented the fair with a basket of strawberries. (Sp)

#### **GRASS AREAS:**

We would like to keep the open grassy fields, and the sloping grass above the baseball outfield for bike polo games and tournaments. We have hosted 4 or 5 tournaments in Sayre Park. Our bike polo club says its the best venue in Colorado! Please don't change it!

I use the open grassy areas, which may be considered "under-utilized" in the previous questions in this survey, for walking and training my dog when these areas are not used by other people/dogs. (I pick up my dog's poo, so don't worry about that!) So I would prefer to leave as much of the existing grass as natural grass. I read recently about how artificial grass can be hotter than asphalt in the summer, both of which can injure a dog's paws. I am also interested to know what type of pesticides are used on the grassy areas in Sayre Park and other city properties because my dog likes to roll around and eat the grass.

I would prefer to see no grass ripped out and keep as much open space as possible. This is important to not have a distracting circus right on Grand to cause more traffic issues.

#### **HORSESHOE PITS:**

I don't think that we need to keep the horseshoe pit. I rarely see people using these features.

Remove Horseshoe pits

Do not remove the horseshoe pits please, baby sizing it down to two rather than three and upgrading the status of the pits they are still used quite regularly

I have never seen anyone use the horseshoe pits and believe those could be removed.

One addition to the horse shoe pits that would be welcomed by families is a corn hole set. [https://www.reddit.com/r/mildlyinteresting/comments/bwu5zi/our local park recently installed a permanent/](https://www.reddit.com/r/mildlyinteresting/comments/bwu5zi/our_local_park_recently_installed_a_permanent/)

#### **LIGHTING:**

lighting along walkways

I also think that lighting needs to be improved, particularly on the south side of the park near Grand Ave—it's downright dangerous to cross there at night.

Lighting at night until the park closes at 10:00 would be helpful.

I would love to see lighting like they have for the basketball courts for the volleyball court. I would also maybe be able to turn on the lights for the baseball field because we put up grass volleyball nets on hot summer weekends. We could have them automatically shut off at 10:00.

Lighting for volleyball court or baseball field more accessible to play at night, to auto shut off at 10:00pm with park closure. Or similar turn on/off function like basketball court.

Adequate night time lighting is also worth the expense.

Lights on volleyball and horse shoe pits

Add more night lighting (Sp)

## **PARKING:**

The parking lot is solely used by hospital employees, before the city worries about additional parking the hospital should address their needs. As the 2nd largest employer in Glenwood they add a lot to the traffic situation, they need to get people out of their cars and using public transportation or car pooling.

the parking is a joke

Wrt parking, employees/patrons of businesses across Hyland Park Drive from the tennis courts frequently use spaces that should be reserved for the park. Need signage.

## **PICKLEBALL:**

There are dedicated Pickleball courts all over the Western Slope but none in Glenwood where many players play but have to travel out of town. No one can play at Sayre right now because of the current surface. Tennis players don't want pickleball activity on the outside community center courts where there is 1 court lined for Pickleball but it's still used for tennis and if you can get on to play Pickleball you have to set up your own net. It'd be great not to have to deal with the tennis issue and have dedicated courts. Also there must be careful attention placed on space around each Pickleball court. Grand Junction courts are very well designed. Aspen courts are only marginally playable; you take a back swing on the baseline and hit the 'wall'. If you build them, they will come!

Pickleball courts are needed but not at the expense of a tennis court. There are already too few tennis courts in town.

Pickleball courts should be to USAPA standards so tournaments can be done to bring in tourism.

Pickleball is a great idea.

This should be approached as a one-time opportunity to address adult recreational and

fitness needs such as pickleball. Pickleball courts would also provide another youth activity. There are four tennis courts (3 with lighting) at the community center and one tennis court available to the public. All at no charge. There are no dedicated pickleball courts in Glenwood.

If Glenwood Springs wants to host a pickleball tournament in the future, you will need 8 courts, not 4. Why not convert both tennis courts to 8 pickleball courts? You already have plenty of tennis courts at the Community Center. Currently, Gypsum has 8 outdoor, dedicated pickleball courts and attracts players from Glenwood Springs, Carbondale, and New Castle. The future of pickleball is in our youth. Already, students are learning to play in their P.E. classes in school. If you had 8 courts, you would see not only adult recreational and competitive players there, but you would also see families and kids - after school, after dinner, on weekends, and in the summer - playing this fast-growing sport. If you can't see the way to 8 courts in place of 2 tennis courts, then I would suggest you start with 4. You'll see how quickly they will get used, and there will be a request for more!

Put pickleball courts away from tennis courts because of noise. It drives tennis players crazy

It's ridiculous for the City to not have any outdoor dedicated Pickleball courts.

Multiple Pickleball courts with separations and lights are desired.

Pickle ball courts should be added. Pickle ball is the fastest growing sport in America, and Glenwood Springs needs some outdoor courts

I would like designated pickleball courts with LED lighting to expand the pickleball program in Glenwood.

Change with the times. Pickleball is a growing sport; tennis participation declining. Add some dedicated Pickleball courts.

Pickleball

## **PLAYGROUND:**

pickle ball courts i would use

I would strongly suggest adding pickleball courts.

Pickleball courts

Pickleball is growing so fast and would be a great addition to the park.

I do not visit Sayre Park because I reside over 2 hours away. However, I am an avid pickleball player and travel all across the state and country for pickleball play and tournaments. Having dedicated pickleball courts in Glenwood Springs would draw visiting pickleball players from across the country who would then stay in your local hotels, eat in your local restaurants, and shop in your local shops. Pickleball players are largely retired people with disposable incomes and they plan their travels around tournaments and great pickleball facilities! Glenwood Springs would benefit from having a dedicated pickleball facility!

I play pickle ball and Glenwood is long overdue for dedicated courts while allowing for other rec. Uses.

Pickleball courts would be wonderful if added!

I would enjoy pickleball if it were available. At least put pickleball lines on the tennis courts so temp pickleball nets can be used

I've raised 2 children who also attended St Stephen Catholic school so we've used Sayer Park a ton. I've also played both USTA matches and private for fun matches on those courts. I'd love to see them repaired and ideally kept with an additional 4 pickleball courts added. The interest exists and each population is growing in interest so I believe it's a great investment.

## **PICNIC SHELTERS:**

Please repair and maintain gazebo

I am surprised that the current playground is labeled as obsolete, as this playground is one of our favorites. Our son likes the bridges, the long runs and big drops of the slides, the bubble window that is so high up, and the climbing features. It isn't rusted or dangerous, and whenever we are there it seems to be well-used and liked by kids. I would just replace the slides with non-bumpy ones and maybe tube-type ones if those are safer than the current open ones? The rest just doesn't seem to need to be replaced.

If you build a toddler playground separate from the existing one, keep the two playgrounds right next to each other. Many of us have children of varying ages that need supervision and having the playgrounds separated by a pavilion would not be good.

Playground that has separate age appropriate play structures. Structures for older kids to play and structures for younger kids to play. Add in removable shade sails to help keep the structures cool in the summer, but can removed in the winter.

Safety barriers to keep kids from running into street near play areas

More shade. Trees or architectural shade. Shade where children play.... it will get hotter as time goes by so shade is important for kids and gatherings. Hot sun on playground equipment can burn or at least rightly discourage use.

more benches near playground

Playground needs to be ADA, everyone needs to play

The playground has a new play surface...I'm not in favor of any renovations.

Providing shade at the playgrounds is really needed as the existing equipment can't be used in the middle of the day of summer.

It's a great park. I would love more shade and some updates fun play structures. I go there a lot over the summer with my two kids. I don't use it much at all for sports so I don't really have huge preferences there.

Look at the park playground facilities in Battlement Mesa, Rifle they are great facilities with fantastic play areas and nice landscaping.

Both kids loved the playground as is. It's not like kids are bored with that equipment. Please don't replace it just to replace it. Modern playground equipment sucks.

Both kids loved the playground as is. It's not like kids are bored with that equipment. Please don't replace it just to replace it. Modern playground equipment sucks.

Having a 2 yr old there aren't many parks that are sized for her so I like the plans to add a 2-5 yr old park segment.

#### **RESTROOMS:**

I like option #2, but with adding additional bathrooms to the south east side of the park. I think we'd greatly benefit from having a bathroom (maybe just 1 stall) on the south western side of the park as well...

And definitely need to do something about the bathrooms.

Pertaining to the restrooms, they are always closed  
New bathroom by bleachers or dugouts

bathrooms updated.

I have a transsexual daughter and I sincerely believe that it would be very important to have a unisex bathroom. It is difficult for my daughter to use public bathrooms. It helps much if you take this into account. Many thanks. (Sp)

#### **STAIRS:**

Better stairs from the outfield down

#### **TENNIS:**

Many searching for adequate Glenwood Springs Tennis Courts, skip any option of S P tennis, due to continued (municipal?) allowance of (unauthorized-?) school coaches (reserving-?) or just commandeering "tennis courts" space for non-tennis classroom/alternative athletic programs, assuming they have entitled exclusive right to do so on a daily(?) basis. I have witnessed occupying groups failing to allow tennis players on to The TENNIS COURTS, due to their abusive and unauthorized ordering TENNIS PLAYERS that their choice to use one or both TENNIS COURTS, for whatever purpose they so desire ! I have had adolescents refuse to leave the court as I and a tennis partner begin hitting on either tennis court. Others commonly convene for illegal youthful tobacco, narcotic abuse, meetings, or other non-related tennis activities. Therefore, this is the Main Reason most Wanting to Play TENNIS search elsewhere to locate local TENNIS COURTS where those TENNIS COURTS are Reserved for Tennis Players.

My biggest issue with Sayre is the degradation of the tennis courts for tennis. Please resurface and stripe for tennis And or pickle ball but NO TURF. Multi use from non court activities have rendered current courts unusable for tennis. No more soccer or dancing please.

We need another spot in Glenwood with three tennis courts available for league play. The rec center has too many teams trying for the three courts and you have to have three courts together with lights to host league events

I would like to see the tennis courts eliminated, or converted to basketball if the existing basketball court was eliminated.

The existing tennis court area is not large enough to fit 4 regulation size pickleball courts and one tennis court. This area needs to be enlarged. Also, does the plan to raise the height of the screen guarantee the protection of players on the courts from being hit by baseballs? Without this protection and/or regulated use of the courts and baseball field, I find these two uses incompatible.

and don't get rid of tennis courts.

#### **VOLLEYBALL:**

The volleyball court needs to stay and if more sand could be added that would be excellent. We have a group that plays there all summer long several days a week and we're not the only ones who use it. There is no other decent sand court in town.

I am part of a large crew of people that play volleyball every Wednesday religiously in the summer and multiple other days throughout the week often. It would be devastating to us all if we lost the court.

Need children's sand pit so they don't interfere with volleyball sand.

Keep the volleyball net, just needs improvement

The current volleyball court serves as a sandbox for children so either remove volleyball and add sandbox or keep the volleyball court.

#### **WALKING / BIKING:**

Bike racks.

Walkway between field and lower section widened so more people can pass.

Walking path that has signage per 1/8 mile wide enough for passing.

Add bike parking and a wide walking and bike path.

Additional bike racks to fit mountain bikes with larger tires i.e. 28in and fat tire bikes and e bikes. For kids and adults!

#### **WATER FACILITIES / AMENITIES:**

Water park area would be awesome

water fountains

I think the 3rd plan on your proposal is the best. It would make me visit the park much more. With the addition of a splash park for the kids

Good water fountains that also include dog bowl feature.

The splash pads in Rifle and Basalt really draw in a crowd, last weekend there were 3 birthday parties at the park in Rifle just because of the splash pad. It would really fill a gap for the community to have a place to come together and enjoy the outdoors together, that doesn't cost a fortune for a family.

Definitely need a water feature in the park.

water fountains

Splash pad water feature

Water fountains for drinking water

The water feature sounds fun but only will be needed if there isn't already another free public water park in town.

More water fountains in the park.

I believe the water splash pad that is going to be put in downtown should be put at Sayre Park instead.

Splash pad near/on playground (perhaps this is represented by water feature on playground question).

Water fountain.

With water being a focal point of Glenwood Springs I would really to see a splash pad installed for kids to cool off.

Sources of water, with colored lights in a fountain at night (Sp)

#### **WINTER USES:**

Ice skating rink

Love the sledding hill.

I think protecting as much of the sledding hill as possible is important due to how heavily it is used all winter long.

#### **GENERAL:**

Do not use the park much at all now. Did often when kids were young (now grown) and for coaching soccer and for playing tennis. Appreciate it now for open space, gathering spot and seeing community use. Believe it should remain multi purpose and perhaps enhanced a bit (pickleball as example) for updated use.

I have nothing else to add. Based on this questionnaire I suggest adding neutral answers to pick as I had to choose an answer that I wasn't knowledgeable about. And please, for the gender question include 'Other'.

We use the park frequently. These suggested improvements seem totally unnecessary. If the playground needs to be modified for accessibility then do that. Otherwise this is a complete waste of money and resources. The playground was just refurbished last year. The plan should also address the unnecessary grass mowing. I often see the city maintenance crew mowing the ball field when the grass does not

need to be cut. The city has a real problem with wasteful spending and inefficient operations and this park improvement plan is a perfect example.

I live less than .5 mile from the park & our family NEVER visits the park: square pegs, round holes. None of the options offer us any reason to visit the park. NO ADDED ATTRACTIONS. Believe me, we are not alone, your parkgoers per acre data proves that. Instead, we regularly travel up to 2 hours to visit parks in the western slope.

I feel that the steps from the middle to lower area should be replaced - they are and have been a safety hazard. Other than that, this is a waste of money to determine a problem that we do not have. Yes, spruce things up a bit, but then take care of the area. This has been allowed to just wear away. Grass gets mowed and that is about it. This survey is slanted with no option to voice an opinion other than whoever wrote it. Additionally, just who are the so-called stake holders??? I can throw a rock to the park and routinely get tennis balls in my front yard. I am not a stakeholder and none of my neighbors are either. This is one more stacked opinion project that does not reflect the priorities of the community. Whose priority is this anyway??? It is not the citizens even though they have to pay the bill for it.

Leave the park open for play, utilization, enjoyment ... not filled up with historical monuments that take away play space. This is a well used park.

Another area of games for larger kids (Sp)

Include a stage for musical group events (kiosk or something similar) (Sp)

The grandstand is historic and great. Please don't mess with it much.

Sprucing up bathrooms, stairs, and fixing basketball facilities should be the priority.

Biking signage and historic signage near picnic pavilion is sufficient- we don't need a "historic plaza". Too much!

Things for the older people to enjoy like in El Jebel

Glenwood needs a Sayre upgrade. Keeps the kids active and off the video games.

Clock

The homeless make the park yucky, especially the bathrooms where they sleep.

I actually think we're trying to do too much with the park and that we should remove a few of the active sport facilities to make room for more passive use space and landscape enhancements.

My preferred use is open space.

Please don't pack in too much stuff. Having open areas is good.

I see a lot of travelers stop at Sayre park for a break. As a parent we stop at specific parks during are road trips. A park that draws in additional visitors will benefit the town as a whole.

Needs to be a family friendly place- adults want to feel welcome as well!

Love options 1 or 2 for renovations. We use this park frequently and are excited to hear improvements are in the works!  
Choose designs that keep maintenance costs minimal.

I like option 2 the most

I would love to see Veltus Park tennis court and basketball courts resurfaced

Improve the tennis court at Veltus Park to make it more usable and tennis friendly

My concern as a citizen is that as little money as possible be spent on this. The park is fine and we have tons of parks in the city. If we have all that extra money, give it back to the taxpayers in a refund.

I think it is great as is. I walk there every day. Our community uses it well. It doesn't seemed packed with people or empty.

leave it alone as much as possible.

Sometimes change is not better. Overall I'm very satisfied with Sayre Park as is.

Great multi use park. Don't ruin it

I feel there are more urgent matters to address in Glenwood than spending too much on Sayre Park. The turf at Sayre is in great condition and putting in new irrigation at this point would be a waste of money. There are amenities a town our size is lacking particularly for locals. Two examples are a gymnastics facility and a Senior Center. Take care of our locals GWS!

Frequently in the evenings I notice that all areas of the park seem to be in use simultaneously and everyone is getting along and having a great time. Not much "improvement" is needed.

No, just leave the park the way it is

I think that Sayre Park is a wonderful community space that has served us well. I love it as it is, and would like to see only minimal changes made to its appearance and the functionality of the bathrooms, but no drastic change.

Keep the current mixed use character of the park.

Sayre Park is just fine as is. Maybe some improvements, but no need to spend a bunch of money on something that already functions just fine. Especially on synthetic turf!

**PARK IS CURRENTLY ACCEPTABLE:**

Great park as it so any improvements are just a cherry on top

Just please leave it a basic park. Otherwise the simple beauty of Glenwood will continue to be Aspenized!!! Which seems to be happening all over at a rapid rate!!!!

#### **STREET IMPROVEMENTS PREFERRED:**

Fix the streets first. Hold off on improvements but maintain the existing facilities

You spend too much money on these kinds of improvements instead of fixing our streets which are in bad need of repairs. Get your priorities straight.

How about fixing our roads?

Stop wasting money on other projects. Fix our streets. Sayre Park is fine as-is.

Sayre park is fine the way it is with a few adjustments. We should be using this money to fix our roads instead!

PARK Is fine. FIX THE STREETS!

This park is fine. We can't afford improvements now. SOUTH BRIDGE, MIDLAND, FIX MY STREET!

Forget the park and fix as many streets as possible with existing funds. Fire the consultants...too much money.

What will proposed items costs? Why is Glenwood proposing a Sayre Park do-over with hired consultants when it cannot or will not address basic municipal needs, specifically streets?

The city of Glenwood Springs needs to get their priorities in order. Why are we discussing a major overhaul of a park that functions adequately - but can't manage to even maintain our city streets?
